110mm

NATURE OF THE DAMAGE AND DEFINITIONS

Code to be used (2 letters)

BR Burnt

Damage caused by fire or a heat source.

CA Broken

Separation of a whole part into at least 2 pieces.

Pulled off

Part or component which has become separated from its support following a knock or pressure

Cracked

Slightly split without the pieces becoming separated.

CD Cut

Separation with sharp edges (cut with a knife)

Torn

Separation with irregular edges

DOES NOT CONCERN THE TYRES

CE Punctured

Loss of pressure following piercing

Slashed

Cut with removal of material (harm)

ONLY CONCERNS THE TYRES

EC Paint chip

Small fragment of paint removed following a knock, stone chipping, projection of broken glass

EN Dented

Accidental distortion of a component which has suffered an impact from the exterior towards the interior only (*does not include undulation and other distortions*).

MA Missing

Part or accessory absent (in the case of a special part for a model or an option, this will only be considered missing if it is indicated on the Downstream Flow Sheet (FFA) or DC41 drawn up by the manufacturer.

PR Contamination

Collective damage resulting from a variety of actions. (fallout)

RF Scratched

Mark made by a fairly deep incision in the paintwork, the windows, the plastic parts

Cut with removal of material (harm)

Rubbed

Multiple marks made by fairly deep incisions in the paintwork, the windows, the plastic parts.

TA Stained

Damage due to a product which changes the colour with a dirty mark (grease, oil, etc.)

PSA CODE	DESCRIPTION OF THE DAMAGE (L ≥ : Length greater than or equal to; S ≥ : Surface area greater than or equal to)		Upper section		Lower section	
			Ext.	Int.	Ext.	Int.
BR/CD	Burn, cut, tear, having an adverse effect on the appearance		Clear			
CA	Crack having a clear adverse effect on the appearance		L ≥ 10 mm		L ≥ 20 mm	
	Any impact that has caused adverse effect and /or caused any break or dislodgment of material in appearance on the vehicle.		Clear			
	Cracked window (specify if there are signs of an impact)		Any crack			
CE	Only concerns punctured and/or nicked tyres				X	
EC	Paint chip (flaking) without difference in shade (without contrast)		S ≥ 15 mm ²			
	Paint chip (flaking) with difference in shade (with contrast)		S ≥ 2 mm ²			S ≥ 15 mm ²
	Chip (flaking) on wheel rim with difference in shade (steel/alloy)				S ≥ 5 mm ²	
	Paint chip (flaking) with difference in shade (with contrast) under the front/rear bumper				S ≥ 15 mm ²	
EN	Clear dent, even if only visible from one position		1 EN or +			
MA	Concerns any missing accessory or special component, with the exception of plastic valve caps					
PR/TA	Localised stain on a painted component or equipment		S ≥ 100 mm ² or L ≥ 10 mm		S ≥ 200 mm ² or L ≥ 20 mm	
	Localised stain on a non-painted component or equipment or on a trim		S ≥ 25 mm ²		S ≥ 200 mm ² or L ≥ 30 mm	
RF	On the bodywork + painted or chromed equipment	Scratch without difference in shade (without contrast)	L ≥ 50 mm			L ≥ 200 mm
		Scratch with difference in shade (with contrast) under the front/rear bumper			L ≥ 30 mm	
		Scratch with difference in shade (with contrast)	L ≥ 5 mm			
		Transit rubs (Rubbing consisting of numerous fine scratches)	L ≥ 400 mm or S ≥ 200 cm ²			
	Equipment non-painted	Scratch	L ≥ 10 mm		L ≥ 30 mm	
		Graze (superficial removal of material)	S ≥ 5 mm ²		S ≥ 30 mm ²	
		Transit rubs (Rubbing consisting of numerous fine scratches)	L ≥ 200 mm or S ≥ 10 cm ²			
	Window	Fine scratch that can be felt with a fingernail	L ≥ 15 mm			
		Wide scratch (approximately 0.5 to 1 mm) or chip	S ≥ 5 mm ²
